Linguistics; Surface Structure; Syntax

ABSTRACT

This general bibliography on discourse and related topics lists over 350 books, articles, and papers, written between 1912 and 1971, covering a great variety of linguistic problems and issues. The subjects range from general topics such as "Nouns and Noun Phrases" and "Language as Symbolization" to such specialized articles as "Samoan Pronominalization" and "Some Notes on the Semantics of Eastern Eskimo Localizers." Most of the entries are in English, while several other languages--for example, German, French, and Russian--are represented. (VM)
